*Mattia Lullini (Italy, 1985) works as if he was cutting and re-assembling pieces from a layered, colored fantasy, allowing his vision to organically shape itself on the surface. He deliberately lets his hands and his mind be driven by the unconscious, which lead the way to a spontaneous yet accurate composition. His relationship with the unconscious part of the creation it's so strong that brings him to the point of working in a sort of lucid dreaming way, creating poignant abstract compositions.*

*Lullini has exhibited his works and painted murals across the globe, including in Sweden, Denmark, Finland, France, Germany, Italy, United Kingdom, Brazil, India, China, Taiwan and South Korea, where he was invited by Busan Art Biennale in 2015. Embracing a multimedia approach Lullini's artistic production features murals, indoor and outdoor sculptural installations, paintings and works on paper. Mattia Lullini currently lives and works in Gothenburg, Sweden.*
